

Earth Day Celebrations

Bharatiya Vidya Bhavan's Public School, BHEL Township, R.C. Puram, Hyderabad, marked Earth Day on 23rd April 2025 with a thoughtful and inspiring assembly activity aimed at raising awareness about the importance of environmental conservation and sustainable living.

The program commenced with an impactful address by Principal Mrs. Chebolu Uma, who emphasized the urgent need to protect our planet and make conscious choices. This was followed by engaging talks delivered by Miss Sonakshi, Master Shubhang, and their teams, who eloquently spoke about the relevance of Earth Day and its global significance.

A key message that resonated throughout the assembly was: "We do not inherit the Earth from our ancestors; we borrow it from our future."

This quote served as a powerful reminder of our collective responsibility to safeguard the Earth for the generations to come.

In an effort to promote values of service and sustainability, the Social Science Department, led by Mrs. Hina Alin Khursheed, Mrs. Anjali Naga Kumari, and Mrs. Mahuya Sarkar, organized a drinking water serving initiative after school hours. This simple yet meaningful act of service was well-received and appreciated by all.

The celebration concluded on an inspiring note, encouraging students and staff to adopt eco-friendly habits and contribute positively to the environment. The school day ended at 12:20 PM, leaving the Bhavan's community with a renewed commitment to protecting our planet.
