

Annual Mass De-Worming Day

The school successfully conducted the Annual Mass De-Worming Day on 7th August 2026 under the Government of India's National De-Worming Day Programme. Albendazole tablets were administered to students of Classes I to X

after obtaining parental consent. The programme was carried out under the supervision of teachers, ensuring the safe administration of the tablets. This health initiative aimed to prevent intestinal worm infections and promote the overall health, nutrition, and well-being of students.
