

Robotics Workshop: Exploring the Future of Learning

A Robotics Workshop was conducted on 11 June 2026 for the Computer Department faculty. The session was led by Dinesh Kumar from Super Teachers. The workshop provided an engaging introduction to robotics, coding, and emerging technologies shaping modern education. Through live demonstrations and interactive discussions, participants explored innovative robotic applications and their classroom integration. The session emphasized the development of creativity, critical thinking, and problem-solving skills among students. The programme was efficiently coordinated by Ramesh. Teachers gained valuable practical insights and were inspired to adopt technology-enabled teaching strategies, making the workshop both enlightening and future-focused.
